📅 30-year horizon

Modeled retirement target

\$965,931

Target nest egg to fund \$60,000/yr initial spending

Current starting point

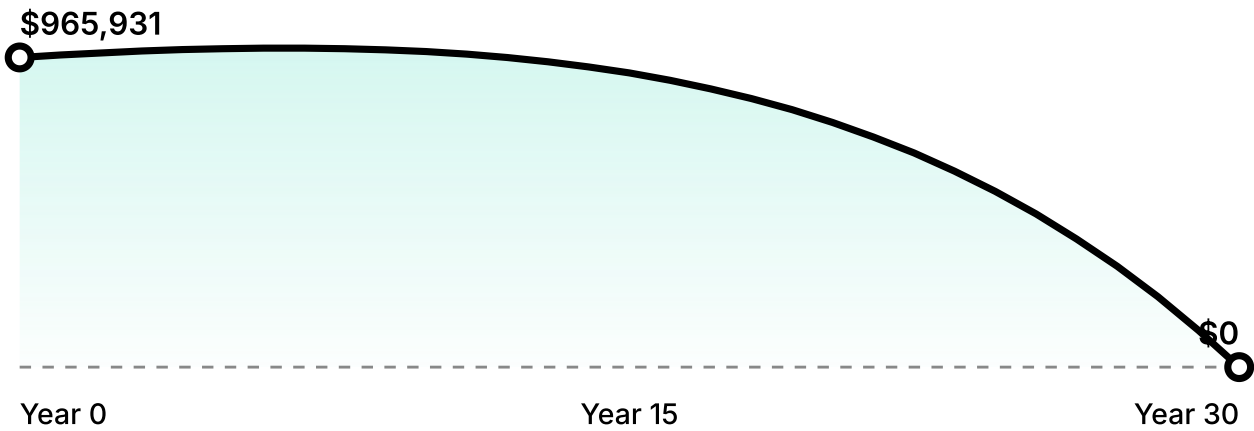

\$500,000

Gap to modeled target: \$465,931

↗ Retirement withdrawals from the modeled target

Modeled end balance: \$0

Starting balance is the modeled target (\$965,931). The separate gap of \$465,931 is between current savings (\$500,000) and this target.

Initial annual spending: \$60,000/yr Nominal return: 7% Inflation: 2.5%
